				Question Text	MA/JS Answer
22	24/8/2016	2	Partner eligibility	<p>According to the following text from Section 6. Eligible Partnership of the 1st call GR-IT, highlighted in red, it seems that the University of Western Macedonia located at Kozani, Greece cannot be involved in the project with funding. Could you please inform me if our conclusion is correct and if there is any other way that our University can participate in the Project and receive financial contribution?</p> <p>In principle to become a project beneficiary, an organisation has to be located (decisive is the legal address of the organisation) in the eligible area of the Programme. Organisations located outside the Programme's eligible area are encouraged to be involved in the projects as associated partners without allocated budget. However if a beneficiary is located outside the Programme area and has a local/regional subsidiary/branch office established in the programme area, it will receive full ERDF funding.</p>	See answer to Question18 of FAQ Set No 1
23	25/8/2016	2	Call Documents	In the call for proposal it is written that the documents must be uploaded on the MIS but I can't find the link to register.	Access to the application is possible through the page http://logon.mnec.gr . For further information on how to register please check the detailed manual entitled "User guide for completing the electronic application form " and the supporting documents.
24	28/8/2016	2	Call Documents	Regarding the relative files of the 1st call for ordinary projects of the programme Greece-Italy 2014-2020, I want to set a question about the percentage of the total budget of the WP2. In the file "Summary Budget Limits for the Call_xlsx", the percentage of the WP2 budget has the maximum limit of 20% of the total budget. In the "Programme and Project Manual", page 59-60, the percentage of the WP2 budget has the maximum limit of 15% of the total budget. Please, clarify which is the correct limit, as it is important for the eligibility of the proposal.	According to the approved by the Monitoring Committee of the Programme INTERREG V/A Greece-italy 2014-2020 "Programme and Project Manual" WP2 budget has the maximum limit of 15% of the total budget.
25	29/8/2016	2		<p>Please elaborate on the term "infrastructure" mentioned in the Terms of Reference. We need to understand what is eligible to be considered infrastructure. Moreover, is there a distinction between light and heavy infrastructure and how is it defined?</p> <p>For instance, if 2 electricity poles are constructed by the project, is this an infrastructure project? Would there be a minimum budget spent on construction so as to call the project an infrastructure one?</p>	For a distinction between "soft projects" and "infrastructure projects" see answer to question 16 _FAQ Set No 1
